Decarbonisation Lead / Net-Zero Retrofit Specialist / Energy Systems Engineer · ORCID 0000-0002-6917-619X · LinkedIn · Google Scholar

Summary

Engineering professional with 8+ years of experience in project management and energy efficiency retrofit. Proven track record leading decarbonisation in social housing, bridging technical requirements with resident-centred delivery. Expert in grant funding (£230k+), PAS2035 compliance, and stakeholder management across the North of England.

Professional Experience

Energy Consultant | V-lab Ltd, UK | 2022 – Present - **Lead Consultant** for the Thercom project; secured **£230,000 in competitive grant funding** (Innovate UK/EU). - Led delivery of smart energy pilots for residential sectors, achieving **~40% average energy savings**. - Managed relationships with clients, consultants, and subcontractors for complex retrofit-aligned products.

Research Associate (Digital Twinning) | Newcastle University, UK | 2025 – Present - Leading project oversight for predictive maintenance tasks (Horizon Europe WILSON project). - Delivering technical advice on energy management systems and asset performance to industrial partners.

Post Doc Research Associate | NZIIC, Teesside University, UK | 2024 – 2025 - **Work Package Lead** for the DESNZ-funded H2Food project; managed techno-economic compliance for industrial decarbonisation. - Generated progress reports, carbon saving assessments, and sustainability case studies.

Research Assistant / Associate | Teesside University, UK | 2018 – 2022 - **Project Manager (Just Transition Project)**: Led design and development of retrofit evaluations in social housing. - Provided technical guidance on fabric upgrades (insulation, windows) and microgeneration (ASHP, solar). - **VIC-Ports (UKRI)**: Managed work packages for energy efficiency; supported bids and tenders for infrastructure.

Key Projects

Just Transition Project | *Social Housing Retrofit* Led evaluation of energy efficiency measures (fabric and microgeneration) across social housing

stocks.

Thercom (Innovate UK) | *Energy Management* Secured £230k and led project management of a human-centred energy efficiency controller.

Applied Skills & Competencies

- **Retrofit & Compliance:** Applied **PAS2035** frameworks during the **Just Transition** project.
 - **Project Management:** Led end-to-end delivery of energy pilots and managed £230k grant funding (PI at **V-lab**).
 - **Technical Advice:** Expert guidance on energy performance for **WILSON** (Newcastle) and **H2Food**.
 - **Bids & Tenders:** Supported successful funding bids for **VIC-Ports** (UKRI) and commercial grants for **V-lab**.
 - **Stakeholder Engagement:** Coordinated contractors, residents, and authorities for **Just Transition** and **CIRPS**.
 - **Technical Reporting:** Generated techno-economic reports for **DESNZ** (H2Food) and the **POST** (UK Parliament).
-

Education

PhD in Energy Efficiency & Human Factors | Teesside University, UK
| 2020 – 2024

MSc in Mechanical Engineering (Distinction) | Teesside University, UK
| 2018 – 2019

MEng in Energy Engineering | Sapienza University of Rome, Italy | 2015 – 2016 *Specialisation in Renewables and Smart Grids. Sapienza Excellence Scholarship.*

BEng in Energy Engineering | Sapienza University of Rome, Italy | 2014 – 2015 *Focus on Thermal Systems and Energy Conversion.*

BSc in Mechanical Engineering | Universidad Central de Venezuela | 2010 – 2014 *Graduated with Distinction.*
